👤 CAREER PROFILE

I'm a web developer who enjoys his work, I have 7 years of experience and I've learned some techniques and frameworks that has helped me to develop web sites for management and commercial use.

💼 EXPERIENCE

Ericsson   August 2015 - Present
CNS - Support Engineer

My main activities consists on server administration, scripting to monitor applications and customer meetings to follow up the cases opened by the different customer I give support. Nowdays I'm assigned to support contracts with USA and Canada customers.

Huawei Technologies   April 2014 - August 2015
System Administrator / CPM

My main activities were the system administration for OSS platforms, in the same way I was in charge for the planning and rollout for the different OSS solutions, in the other hand I had a leadership role for the installation and integration for the different OSS solutions included on the project and project management.

Jobomas   December 2013 - April 2014
Web developer

I was in charge to index websites using web crawlers for Jobomas websites,also, I was frontend and backend developer for the websites mercadojobs.com and casifree.com, finally I developed a management website for mercadojobs.com

📋 PROJECTS

In the list below you can find some of my developments made in my different works

Mercadojobs - Responsive website for job listings.

Casifree - Responsive website for cupons and offers.

Matias Cano Photographer - Responsive website for cupons and offers.

Viliv Condos - Lading Page that is part of a templates created in-house and exclusive for TopMexicoRealEstate.

La Escondida Condos & Villas - Micro website created exclusive for TopMexicoRealEstate.
